

PLAKSHA UNIVERSITY

Facilities for Differently Abled

Plaksha University is committed to providing an accessible physical environment for everyone. To achieve this, we continuously work to eliminate obstacles and barriers across indoor and outdoor facilities, including academic buildings, medical centers, and workplaces. Accessibility extends beyond buildings to include steps and ramps, corridors, footpaths, curb cuts, parking areas, entry gates, emergency exits, restrooms, and any obstacles that may hinder pedestrian movement.

Additionally, Plaksha University ensures inclusive transportation by providing accessible university buses, enabling persons with disabilities to travel comfortably and equitably. We strive to create opportunities for all individuals to access information and navigate our campus seamlessly. Our buildings are equipped with essential accessibility features such as elevators, ramps, and other necessary accommodations to foster an inclusive environment for everyone.
